

# SUBSCRIBR

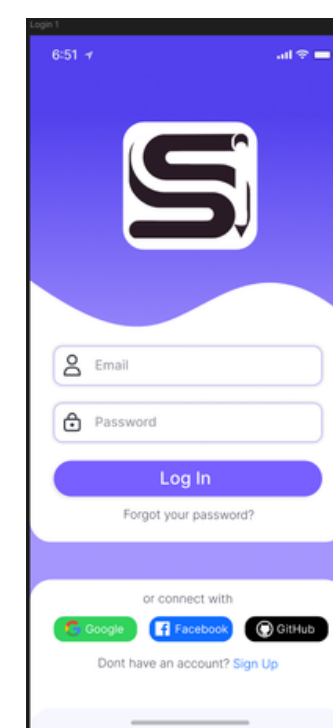

## User Manual

### ONBOARDING

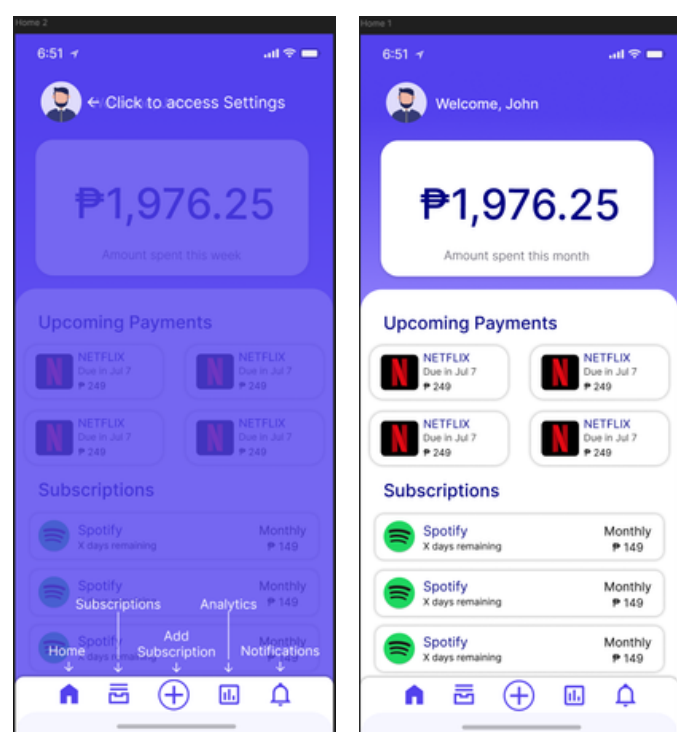

When opening the app for the first time you will be greeted with an onboarding pages that tells you what the app is all about

### LOGIN

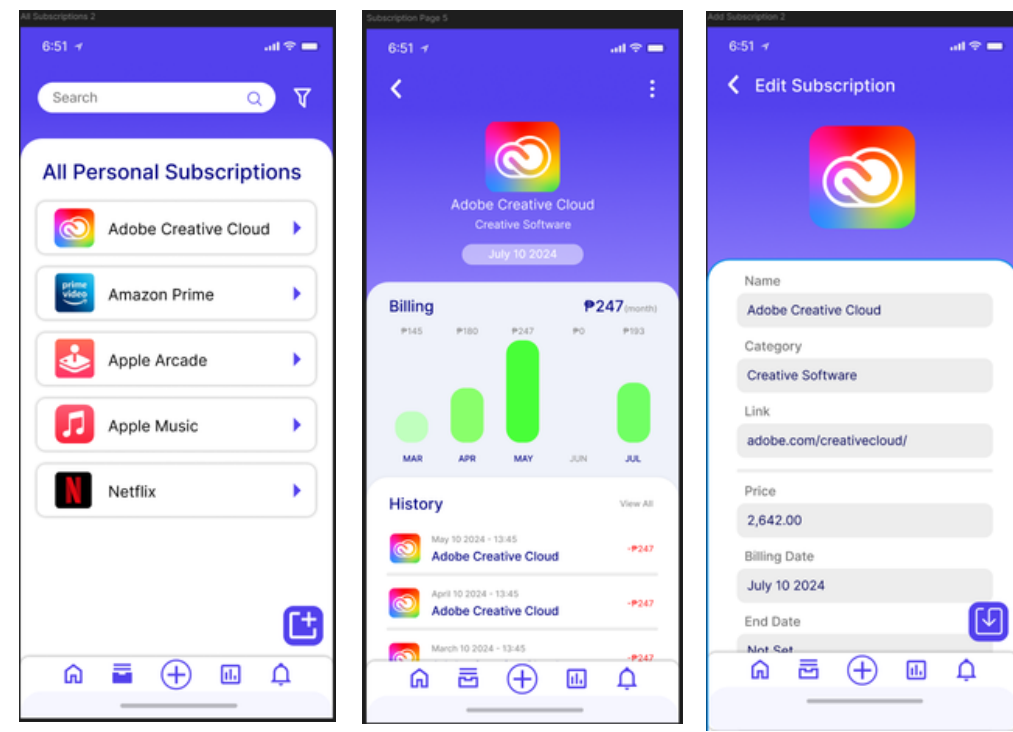

When opening Subscriber, you will be prompted to log in. Enter your email address and password, or log in through Google, Facebook, or GitHub by clicking their respective buttons. If you don't have an account, click "Sign Up" to create one.

### HOME

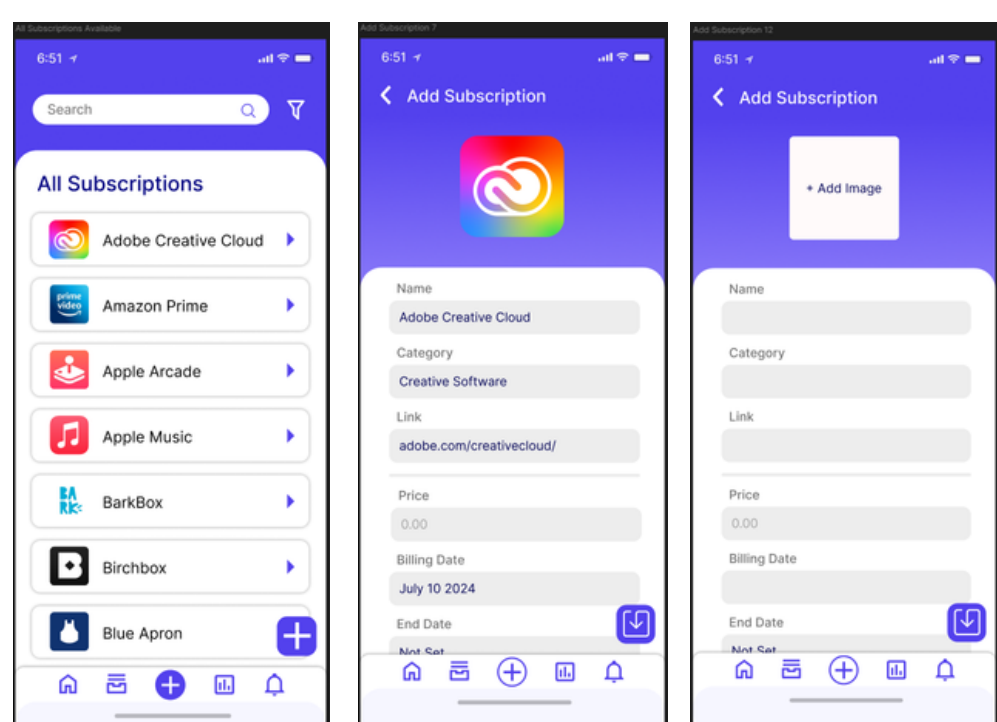

Opening the app for the first time it will show you the home page and highlights the navigator bar at the bottom which has the Home, Subscriptions, Add Subscription, Analytica and Notification buttons. The home page also has features like profile, the amount you spend per month, upcoming payments and your subscriptions.

### SUBSCRIPTIONS

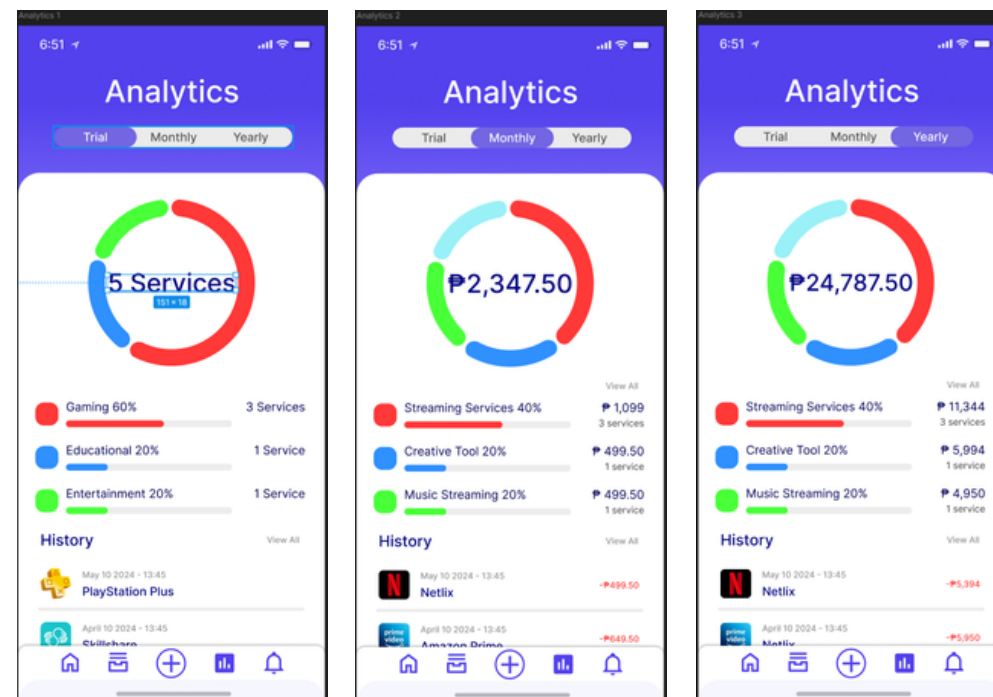

In the subscriptions page it will show you all the subscription services you are currently paying for, you can also see the details about each subscription as well as edit them.

### ADD SUBSCRIPTIONS

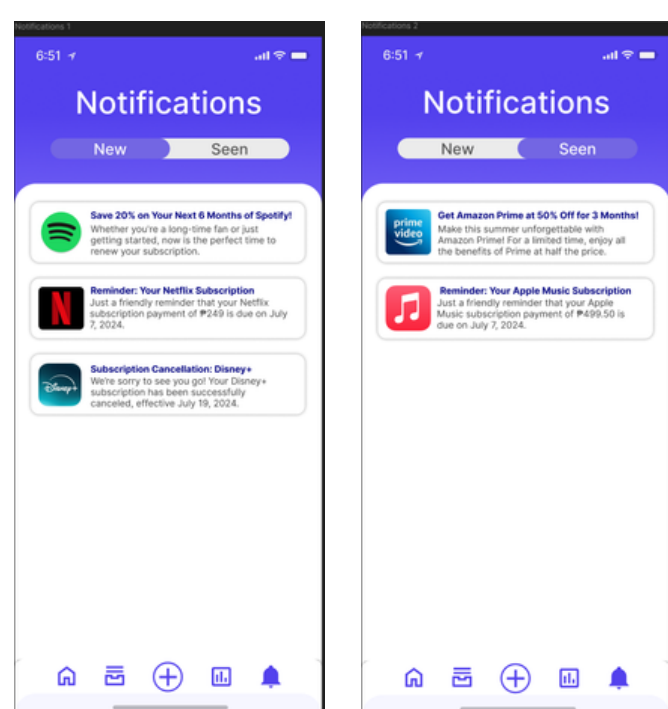

For the add subscription page it will show you popular subscription services, you can also search for a specific subscription service using the search box or use the filter to narrow down your search. When opening a specific subscription it will show you the details and you will choose the billing cycle and payment method before adding it, you can also make a custom subscription if that subscription is not in the app.

### ANALYTICS

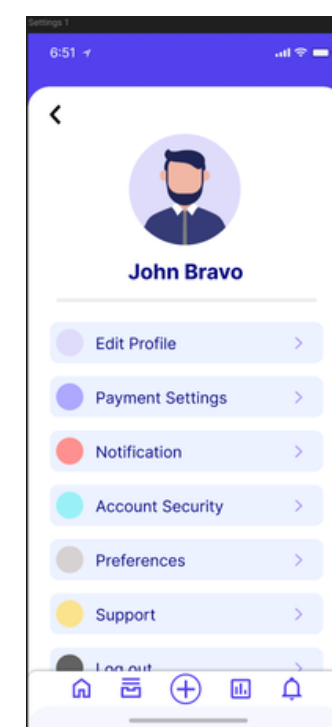

The analytics page will show you all your active trial subscriptions, analyze your subscription patterns with detailed monthly and yearly insights and see the total amount spent on subscriptions for each month and year

### NOTIFICATIONS

The Notifications Page keeps you updated with important alerts and messages like subscription payment reminders, subscription promos and subscription cancellation messages.

### PROFILE/SETTINGS

The Profile/Settings Page allows you to customize and manage your account. Here you can edit your profile, manage payment settings, customize notification settings, enhance account security, set preferences, access support, and securely log out.
